

# Strengthening food systems transformation through agroecology

Tuesday 27 July 2021 | 19:30 – 20:20 CEST | 13:30-14:20 EDT

## A unifying framework for food systems transformation

The following call to action invites governments, international organizations, the private sector, civil society and consumers to adopt the 13 principles to guide agriculture and food systems transformation.

**A call for governments, private companies and civil society to adopt 13 key principles**

The call agrees that **the set of 13 principles** for food systems transformation described in the **2019 report** of the High-Level Panel on Food Security and Nutrition must **serve as a basis for the transformation that is urgently needed**. It stresses that the full set of 13 principles must be respected and cautions against co-optation and green-washing by organizations that use terms such as agroecology or regenerative agriculture but do not intend to implement all 13 principles.

## Investment initiatives

The following initiative aims to transform food systems through investing in principles-based agroecologically aligned food systems businesses that are economically viable and deliver sustainable impact.

**Transformation Investing in Food Systems (TIFS)**

Initiative working to **increase transformational investing in global food systems**. Investments will come from foundations and other investors aligned with the principles of the Global Alliance for the Future of Food. TIFS is an **Allied initiative of the Global Alliance for the Future of Food**, and **partners with the Agroecology Fund** and other aligned initiatives to advance the work in food systems transformations.
